

Clearing Electrode for CESR-TA - Test Pipes -

11 November 2009

Y. Suetsugu, KEKB vacuum group

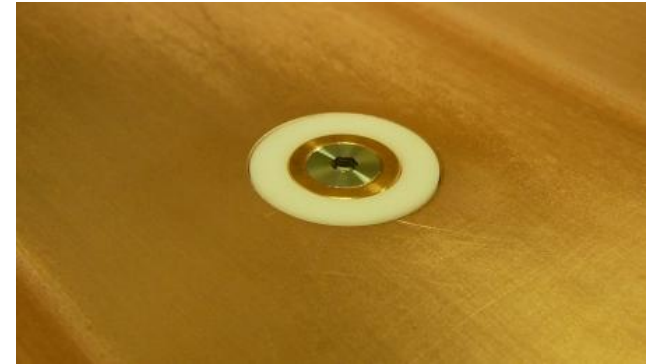

Test pipes

- We had received two test pipes on 11/6.

Test pipes

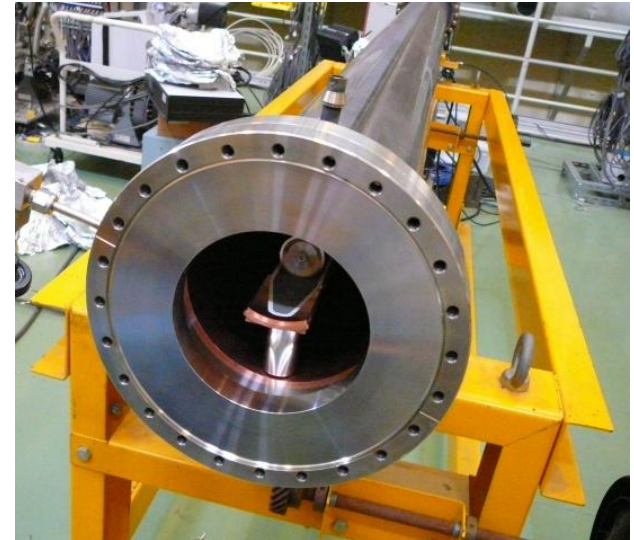

- The KEK-type connections were assembled.
 - The height of port was a little bit lower.
 - We used a socket with a length of 2mm shorter.
 - We will send two sockets (39 mm and 37 mm) to you in case.

- The test pipes was sent to the manufacturer for the thermal spray of electrode this Monday (11/9).
- The thermal spray will finish this week (~11/13).

Test pipes

- We will receive again the pipes on 11/16, then check the insulation resistance in vacuum.
- We hope we can send back the pipes in next week.
- We will send back:
 - (1) Two test pipes
 - (2) On package as it is (not opened)
 - (3) Two N-type feed-throughs with 54 mm-diameter flanges
 - (4) Four sockets (39 mm x 2, 37 mm x 2)
