Surface Power Density (W/mm²)

Linear Power Density (W/m)

Drift
Dipole
Wiggler
Other
The image contains a graph with the following axes:

- Y-axis: Photons/m/Beam Particle
- X-axis: S (cm)

The graph is labeled as `synrad_job144_posx` and shows different sections labeled as Drift, Dipole, Wiggler, and Other.

On the Y-axis, the values range from -1 to 25, with intervals at 5.

On the X-axis, the values range from 4350 to 4400, with intervals at 5.
