Aluminum end ring (part of field cage) skin does not completely overlap providing a surface for mounting the support.

Aluminum endplate solid ring

shown: 8-1.25-15 helicoil, ~8.4 mm drill, ~10.3 mm OD bolt circle radius 38.80 cm

clearance is 2mm which should not pose a problem for installation

Aluminum endplate machined to a web

bands extend beyond the face of the module to provide biasing through the gate stand-off distance, requires extra electrical contacts shown: readout module 3-GEM (2mm) with GEM gate (10mm) extra 6mm in frame
