Cornell TPC event: single track through the red pads

ArCO₂(10%) cage: -20kV @ termination: -900V grid: -600V pads: -2000V anode: +550V

There are 7 instrumented pad rows on the readout board. The 32 pulse height spectra are offset in the display to correspond to the 7 pad rows; the color identifies the pad within the row.

2048 time buckets, 100MHz, 20.48 µs
